

Quality policy

STENI's vision is "*Creating the ultimate building expressions for future generations*". This requires high quality in all internal processes and external deliveries.

Quality at STENI means that all deliveries are in accordance with the customer's expectations and the specifications agreed with the customer, and applicable requirements in laws and regulations.

External and internal deliveries and processes shall be characterized by our fundamental values: Respect, innovative, quality and customer-oriented.

We will at all times work to satisfy the customer's needs and expectations. Not everyone has direct contact with external customers. Managers therefore have a responsibility to establish and maintain good work processes and routines that ensure that the customer's needs are met and that they work efficiently.

Services, products and processes shall be subject to continuous improvement. This includes working methods, competence development and utilization of available technology.

No one should get sick or injured from performing their work at STENI. We will at all times strive to facilitate the work situation for the benefit of the individual employee.

Within these frameworks, the individual worker has the responsibility for the quality of their own work.

A handwritten signature in blue ink, appearing to read "Geir Olav Farstad".
